Investment Philosophy and Objective

The VanEck VIP Global Gold Fund seeks long-term capital appreciation by investing in common stocks of gold-mining companies. The Fund may take current income into consideration when choosing investments. The Fund’s benchmark is the NYSE Arca Gold Miners (GDMNTR) Index. The Fund is an actively managed portfolio investing in gold-mining equities and geologist Joe Foster has been a part of the investment team since 1996.

The Fund offers exposure to gold, a distinct asset class typically fueled by robust investment and fabrication demand, as well as by ongoing supply constraints. Gold-related investments may provide a hedge against financial assets in volatile markets or inflationary periods. Our specialized investment team conducts continuous on- and under-the-ground research to assess mining efficiencies and opportunities.
